Certifications & Audits

At Trade Milk, we build our business on long-term partnerships, operational reliability, and uncompromising quality. With this mindset, we created Milcore – a brand designed to meet the real expectations of today's food industry.

Milk at the core of quality is not just our slogan. It defines how Milcore products are developed, sourced, and delivered: based on carefully selected Polish milk, consistent parameters, and strict quality control at every stage of production. Our goal is to provide B2B partners with solutions that ensure stability, efficiency, and predictability in their processes.

Milcore stands for a focused, professional approach to dairy ingredients – supporting your business with products you can rely on, batch after batch.

Maryla Czarnowicz-Mularczyk

CEO, Trade Milk

Full Cream Milk Powder

Full cream milk powder delivering a full dairy profile and dependable quality, tailored to the needs of large-scale food production.

Physical & chemical parameters

Water content [%]	≤ 4,0
Fat content [%]	≥ 26,0
Protein content [%]	≥ 25,0
pH value	6,4 – 6,9
Scorched particles	Disc A, A/B
Antibiotics and inhibitory substances	Absent

Skimmed Milk Powder

Skimmed milk powder with controlled protein level and consistent physicochemical parameters, ensuring process stability and product uniformity.

Physical & chemical parameters

Water content [%]	≤ 4,0
Fat content [%]	≤ 1,5
Protein content in dry matter [%]	≥ 34,0
pH value	6,2 – 6,8
Scorched particles	Disc A, A/B
Antibiotics and inhibitory substances	Absent

Sweet Whey Powder

DEMINERALIZED

Carefully processed sweet whey powder offering balanced composition and reliable quality for a wide range of food industry uses.

Physical & chemical parameters

Water content [%]	≤ 4,0
Fat content [%]	≤ 1,5
Protein content [%]	≥ 11,0
pH value	6,0 – 6,5
Scorched particles	Disc A, A/B
Antibiotics and inhibitory substances	Absent

Whey Protein Concentrate

Whey Protein Concentrate 80 with high protein content, excellent solubility, and repeatable parameters, designed for demanding nutritional and functional formulations. Available in instant and regular form.

Physical & chemical parameters

Water content [%]	≤ 6,5
Fat content [%]	≤ 8,0
Protein content in dry matter [%]	≥ 80,1
pH value	≥ 6,0
Scorched particles	Disc A, A/B
Antibiotics and inhibitory substances	Absent

Buttermilk Powder

High-quality buttermilk powder with stable composition and functional properties, supporting consistent performance and clean dairy taste in industrial food applications.

Physical & chemical parameters

Water content [%]	≤ 4,0
Fat content [%]	≤ 8,0
Protein content [%]	≤ 30,0
pH value	6,4 – 6,9
Scorched particles	Disc A, A/B
Antibiotics and inhibitory substances	Absent

Milk Protein Concentrate

A high-quality source of dairy protein, designed to enhance nutrition and functionality in a wide range of products. Available in various protein levels, MPC delivers excellent solubility, texture, and performance for beverages, bakery, dairy, and nutritional applications. Perfect for manufacturers seeking clean-label, protein-enriched solutions.

Physical & chemical parameters

Water content [%]	≤ 5,0
Fat content [%]	≤ 2,0
Protein content in dry matter [%]	60-85
pH value	6,2-7,2
Scorched particles	Disc A, A/B
Antibiotics and inhibitory substances	Absent

Tailor-made Product

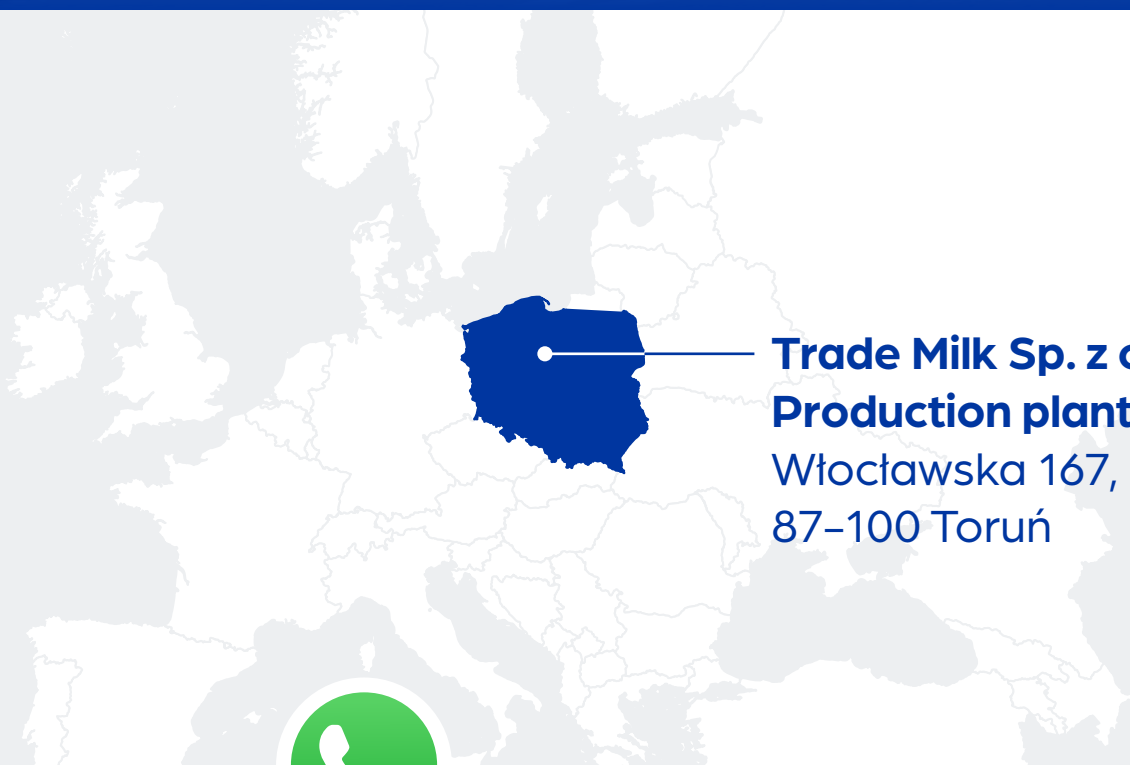

Customized solutions developed in line with specific technical requirements and application needs of each client.
